

PLANET SUPRA iBright

- ① By just applying the paint on the wall, your room will be much brighter.
- ② You can use smaller wattage bulbs or tubes for the same illuminance.
- ③ You can feel your room spacious by enhancing brightness.

A room with PLANET SUPRA iBright painted on the walls gets 20% brighter than conventional white paint.

When the light hits the wall/ceiling, the wall absorbs the light. However, with the application of PLANET SUPRA iBright, the light from the bulbs or tubes are effectively reflected without losing illuminance.
